

PRUTHVI YAJAMAN

AI/ML Engineer | Data Analyst | GenAI Engineer

7676264887 • pruthviyajaman@gmail.com • www.linkedin.com/in/pruthvi-yajaman • DOB: 16-12-2003

Summary

Drive machine learning development with hands-on experience in data analytics, generative AI app development, and programming in Python and JavaScript. Enhance solutions through collaborative innovation and proven abilities in improving team productivity, reducing costs, and advancing data accuracy. Earned multiple certifications in machine learning, cybersecurity, and data science, dedicated to continuous growth and delivering impactful AI solutions.

KEY ACHIEVEMENTS

Developed resilient web agents

Improved resilient web agents with fallback logic and error handling, achieving standard uptime in dynamic browser environments.

Integrated computer vision models

Merged computer vision models into real-world applications, improving detection accuracy by 15% compared to baseline methods.

National-Level Project Expo Penultimate Round Qualifier

Presented a project at a **National-Level Project Expo** and progressed to the penultimate stage among competing teams.

Experience

NETCRAFTZ

AI/ML Trainer

01/2026 - 06/2026

- Delivered training sessions on Artificial Intelligence and Machine Learning concepts.
- Guided learners through data preprocessing and model development workflows.
- Trained **50+ students** in AI/ML fundamentals with hands-on projects.

Mindmatrix

GenAI Developer Intern

02/2026 - 05/2026

- Assisted in integrating Large Language Models (LLMs) into applications.
- Integrated AI models and APIs into web/mobile applications.
- Worked with Python and AI frameworks to create functional prototypes.

Projects

Automated Web Agent

2024 - 2026

Summary of the Project

- Expanded a resilient web automation agent capable of interacting with dynamic browser environments using fallback logic and error handling, ensuring >95% task completion reliability.
- Complied cloud-based workflows for scalable data extraction and processing, reducing manual effort by 70%.
- Applied computer vision and machine learning techniques to enhance automation accuracy and broaden application scope.

-AI-Powered Exam Preparation Tool

2025

Summary of the Project

- Created a modular cheat sheets and flashcard generators using NLP techniques, enabling faster learning and structured revision for technical subjects.

Skills

Core Skills:

Machine Learning & AI Agent Design, Browser Automation, Computer Vision, Prompt Engineering, Error Handling & Resilient System Design

TRAINING / COURSES

Machine Learning Specialization — Stanford Online - On progress

Data Science & Analytics Certificate — Microsoft - ID: MST-519417

EDUCATION

Visvesvaraya Technological University

2022 - 2026

AI & Machine Learning | GPA: 8.72 / 10.0

Department of Pre-University Education — Govt of Karnataka

2020 - 2022

PUC Computer Science — 80.50%
